

MATHS CURRICULUM COVERAGE

Level Expected at the End of EYFS	
Number <ul style="list-style-type: none">• Have a deep understanding of number to 10, including the composition of each number.• Subitise (recognise quantities without counting) up to 5.• Automatically recall (without reference to rhymes, counting or other aids) number bonds up to 5 (including subtraction facts) and some number bonds to 10, including double facts.	Numerical Patterns <ul style="list-style-type: none">• Verbally count beyond 20, recognising the pattern of the counting system.• Compare quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity.• Explore and represent patterns within numbers up to 10, including evens and odds, double facts and how quantities can be distributed equally.

Aims of the national curriculum
<p>Aims The national curriculum for mathematics aims to ensure that all pupils:</p> <p>Become fluent in the fundamentals of mathematics, including through varied and frequent practice with increasingly complex problems over time, so that pupils develop conceptual understanding and the ability to recall and apply knowledge rapidly and accurately.</p> <p>Reason mathematically by following a line of enquiry, conjecturing relationships and generalisations, and developing an argument, justification or proof using mathematical language</p> <p>Can solve problems by applying their mathematics to a variety of routine and nonroutine problems with increasing sophistication, including breaking down problems into a series of simpler steps and persevering in seeking solutions</p> <p>As trust, we have taken on board the findings of the recent Ofsted research review into mathematics to break down curriculum components into declarative, procedural and conditional knowledge.</p> <p>Declarative knowledge is static in nature and consists of facts, formulae, concepts, principles and rules. All content in this category can be prefaced with the sentence stem 'I know that'.</p> <p>Procedural knowledge is recalled as a sequence of steps. The category includes methods, algorithms and procedures: everything from long division, ways of setting out calculations in workbooks to the familiar step-by-step approaches to solving quadratic equations. All content in this category can be prefaced by the sentence stem 'I know how'.</p> <p>Conditional knowledge gives pupils the ability to reason and solve problems. Useful combinations of declarative and procedural knowledge are transformed into strategies when pupils learn to match the problem types that they can be used for.</p> <p>All content in this category can be prefaced by the sentence stem 'I know when'.</p>

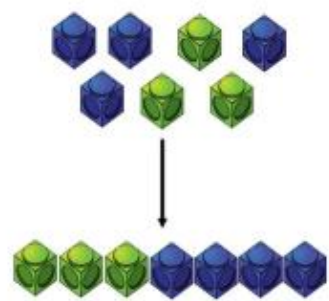

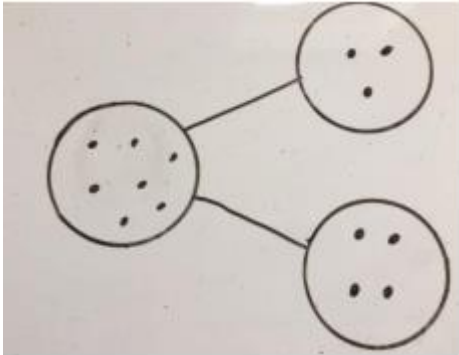

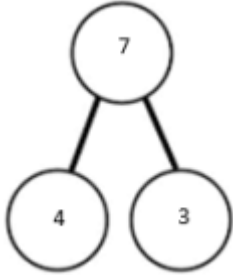

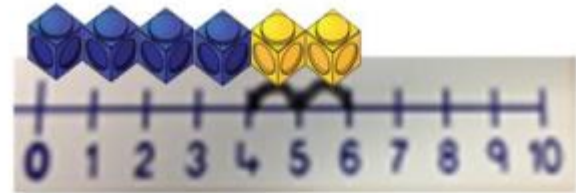

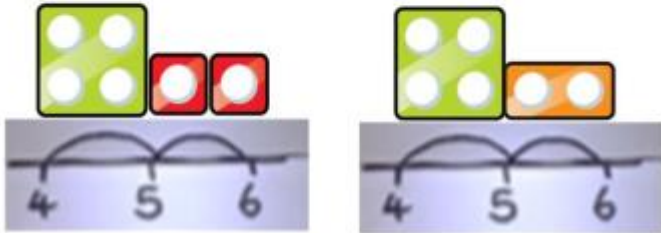

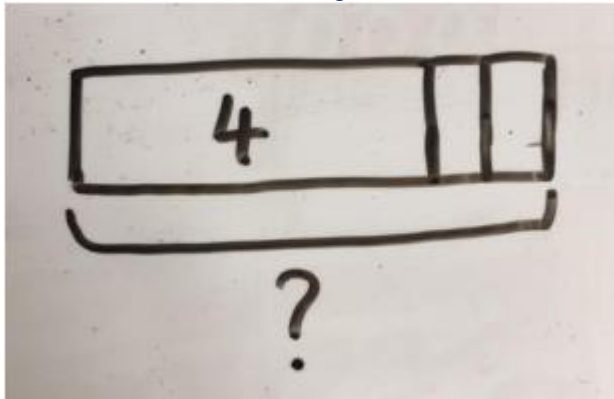

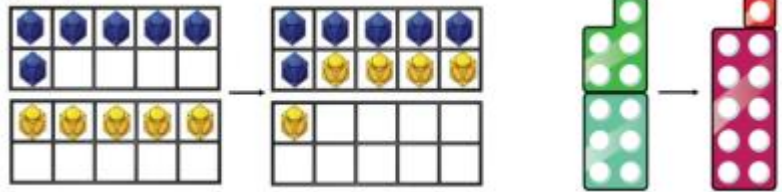

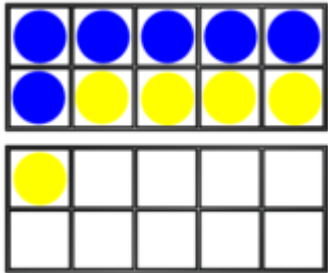

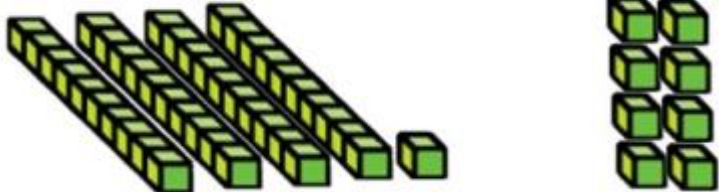

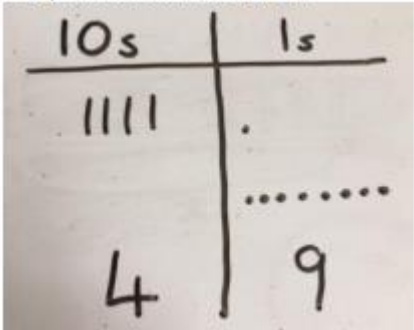

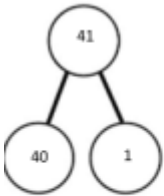

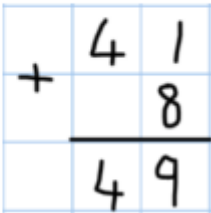

Skills Progression
Number <ul style="list-style-type: none">• Declarative- knowing what

<div><div>• Procedural- knowing how</div><div>• Conditional- knowing when and why</div></div>						
Early Years	Year 1	Year 2	Year 3	Year 4	Year 5	Year 6
<p><u>Declarative</u></p> <ul style="list-style-type: none">• Say number words in sequence• Subitise (recognise quantities without counting) up to• Match numeral to quantity• Link the number symbol (numeral) with its cardinal number value. <p><u>Procedural</u></p> <ul style="list-style-type: none">• Count objects from a larger group.• Count objects in irregular arrangements <p><u>Conditional</u></p> <ul style="list-style-type: none">• Recognise amounts that amounts that have been rearranged remain the same, if nothing has been added or taken away (conservation).	<p><u>Declarative</u></p> <ul style="list-style-type: none">• Read and write numbers to at least 100 in numerals.• Read and write numbers from 1 to 20 in numerals and words.• Count to and across 100 forwards and backwards• Count forwards and backwards in multiples of 2, 5 and 10, up to 10 multiples, beginning with any multiple, and count forwards and backwards through the odd numbers.• Recognise odd and even numbers.• Identify one more or less than a given number. <p><u>Procedural</u></p> <ul style="list-style-type: none">• Identify and represent numbers using objects and pictorial representations including the number line.• Use the language of: equal to, more than, less than, most, least <p><u>Conditional</u></p> <ul style="list-style-type: none">• Reason about the location of numbers to 20 within the linear number system, including comparing using < > and =.	<p><u>Declarative</u></p> <ul style="list-style-type: none">• Read and write numbers to at least 100 in numerals and in words.• Identify numbers using different representations, including the number line.• Recognise the place value of each digit in a two-digit number• Count in steps of 10 from any number, forward and backward <p><u>Procedural</u></p> <ul style="list-style-type: none">• Order and compare numbers from 0 up to 100; use < > and = signs.• Represent and estimate numbers using different representations, including the number line.• Compose and decompose 2-digit numbers using standard and non-standard partitioning. <p><u>Conditional</u></p> <ul style="list-style-type: none">• Reason about the location of any 2-digit number in the linear number system, including identifying the previous and next multiple of 10.• Use place value and number facts to solve problems.	<p><u>Declarative</u></p> <ul style="list-style-type: none">• Read and write numbers up to 1000 in numerals and in words• Recognise the place value of each digit in a three-digit number.• Identify numbers using different representations.• Count from 0 in multiples of 4, 8, 50 and 100; find 10 or 100 more or less than a given number.• Know that 10 tens are equivalent to 1 hundred, and that 100 is 10 times the size of 10; apply this to work out how many 10s there are in other 3-digit multiples of 10. <p><u>Procedural</u></p> <ul style="list-style-type: none">• Order and compare numbers up to 1000.• Represent and estimate numbers using different representations.• Compose and decompose 3-digit numbers using standard and non-standard partitioning. <p><u>Conditional</u></p> <ul style="list-style-type: none">• Reason about the location of any 3-digit number in the linear number system, including identifying the previous and next multiple of 100 and 10.• Solve number problems and practical problems involving the decorative and procedural knowledge above.	<p><u>Declarative</u></p> <ul style="list-style-type: none">• Identify and represent numbers using different representations.• Recognise the place value of each digit in a four-digit number (thousands, hundreds, tens, and ones).• Count in multiples of 6, 7, 9, 25 and 1000.• Count backwards through zero to include negative numbers• Find 1000 more or less than a given number.• Know that 10 hundreds are equivalent to 1 thousand, and that 1000 is 10 times the size of 100; apply this identify and work out how many hundreds there are in other 4-digit multiples of 100.• Read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value. <p><u>Procedural</u></p> <ul style="list-style-type: none">• Order and compare numbers beyond 1000.• Estimate numbers using different representations.• Compose and decompose 4-digit numbers using standard and non-standard partitioning.• Round any number to the nearest 10, 100 or 1000• Reason about the location of any 4-digit number in the linear number system, including identifying the previous and next multiple of 1000 and 100 and rounding to the nearest of each.• Solve number and practical problems that involve all of the above and with increasingly large positive numbers.	<p><u>Declarative</u></p> <ul style="list-style-type: none">• Read and write numbers to at least 1 000 000 and determine the value of each digit• Recognise the place value of each digit in numbers with up to 2 decimal places.• Count forwards or backwards in steps of powers of 10 for any given number up to 1 000 000.• Count forwards and backwards with positive and negative whole numbers, including through zero.• Know that 10 tenths are equivalent to 1 one, and that 1 is 10 times the size of 0.1;• Know that 100 hundredths are equivalent to 1 one, and that 1 is 100 times the size of 0.01;• Know that 10 hundredths are equivalent to 1 tenth, and that 0.1 is 10 times the size of 0.01;• Read Roman numerals to 1000 (M) and recognise years written in Roman numerals. <p><u>Procedural</u></p> <ul style="list-style-type: none">• Order and compare numbers to at least 1 000 000.• Compose and decompose numbers with up to 2 decimal places using standard and non-standard partitioning.• Round any number up to 1 000 000 to the nearest 10, 100, 1000, 10 000 and 100 000. <p><u>Conditional</u></p> <ul style="list-style-type: none">• Reason about the location of any number with up to 2 decimal places in the linear number system, including identifying the previous and next multiple of 1 and 0.1 and rounding to the nearest of each.• Solve number problems and practical problems that involve all Year 5 Declarative and Procedural knowledge.• Interpret negative numbers in context.	<p><u>Declarative</u></p> <ul style="list-style-type: none">• Read and write numbers up to 10 000 000 and determine the value of each digit.• Recognise the place value of each digit in numbers with up to 10 million, including decimal fractions.• Understand the relationship between the powers of 10 from 1 hundredth to 10 million, and use this to make a given number 10, 100, 1000, 1 tenth, 1 hundredth or 1 thousandth times the size (multiply by 10, 100 and 1000).• Round any whole number to a required degree of accuracy. <p><u>Procedural</u></p> <ul style="list-style-type: none">• Order and compare numbers up to 10 000 000.• Compose and decompose numbers with up to 10 million using standard and non-standard partitioning.• Use negative numbers in context, and calculate intervals across zero. <p><u>Conditional</u></p> <ul style="list-style-type: none">• Reason about the location of any number with up to 2 decimal places in the linear number system, including identifying the previous and next multiple of 1 and 0.1 and rounding to the nearest of each.• Solve number problems and practical problems that involve all Year 6 Declarative and Procedural knowledge.•

		<p>subtraction of one number from another cannot</p> <ul style="list-style-type: none">• Solve problems involving multiplication and division, using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts.• Relate grouping problems where the number of groups is unknown to multiplication equations with a missing factor, and to division equations (quotitive division).• Show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot• Recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.	<p>solve contextual problems with different structures, including quotitive and partitive division.</p> <ul style="list-style-type: none">• Understand the inverse between addition and subtraction, and know how both relate to the part-part-whole structure.• Estimate the answer to a calculation and use inverse operations to check answers.	<ul style="list-style-type: none">• Apply place-value knowledge to known additive and multiplicative number facts (scaling by 100).• Manipulate multiplication and division equations, and understand and apply the commutative property of multiplication.• Understand and apply the distributive property of multiplication.• Estimate and use inverse operations to check answers to a calculation.	<p>expressa given number as a product of 2 or 3 factors.</p> <p><u>Conditional</u></p> <ul style="list-style-type: none">• Solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why.• Solve problems involving multiplication and division including using their knowledge of factors and multiples, squares and cubes.• Solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates.• Apply place-value knowledge to known additive and multiplicative number facts (scaling facts by 1 tenth or 1 hundredth).• Solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign.• Use rounding to check answers to calculations and determine, in the context of a problem, levels of accuracy.	
--	--	---	---	---	---	--

					equivalents of $\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{5}$, $\frac{2}{5}$, $\frac{4}{5}$ and those fractions with a denominator of a multiple of 10 or 25.

Calculation Policy		
Addition		
Key vocab: sum, total, parts and wholes, plus, add, altogether, more, 'is equal to', 'is the same as'		
Concrete	Pictorial	Abstract
<p>Combining two parts to make a whole (use other resources too eg. Eggs, shells, teddy bears, cars)</p> 	<p>Children to represent cubes using dots or crosses. They could put each part on a part whole model too</p> 	<p>$4 + 3 = 7$ Four is a part, 3 is a part and the whole is 7</p> 
<p>Counting on using number lines using cubes or numicon</p>  	<p>A bar model which encourages the children to count on rather than count all</p> 	<p>The abstract number line: What is 2 more than 4? What is the sum of 2 and 4? What is the total of 4 and 2? $4 + 2$</p> 
<p>Regrouping to make 10; using ten frames and counters/ cubes or using numicon</p> <p>$6 + 5$</p> 	<p>Children to draw the ten frame and counters/cubes</p> 	<p>Children to develop an understanding of equality eg.</p> $6 + \square = 11$ $6 + 5 = 5 + \square$ $6 + 5 = \square + 4$
<p>TO + O using base 10. Continue to develop understanding of partitioning and place value</p> <p>$41 + 8$</p> 	<p>Children to represent the base 10 eg. Lines for tens and dot/crosses for ones</p> 	<p>$41 + 8$</p>  $1 + 8 = 9$ $40 + 9 = 49$ 

TO + TO using base 10. Continue to develop understanding of partitioning and place value
36 + 25

Children to represent the base 10 in a place value chart

Looking for ways to make 10

$36 + 25 =$

$30 + 20 = 50$
 $5 + 5 = 10$
 $50 + 10 + 1 = 61$

36

Formal method:

$$\begin{array}{r} +25 \\ 36 \\ \hline 61 \\ 1 \end{array}$$

Use of place value counters to add HTO + TO, HTO + HTO etc. When there are 10 ones in the 1s column- we exchange for 1 ten, when there are 10 tens in the 10s column- we exchange for 1 hundred

Children to represent the counters in a place value chart, circling when they make an exchange

243

+368

611

1 1

Conceptual variation; different ways to ask children to solve 21 + 34

?	
21	34

Word problems:
In Year 3, there are 21 children and in Year 4 there are 34 children.
How many children in total?

21 + 34 = 55 Prove it

21

+34

—

21 + 34 =

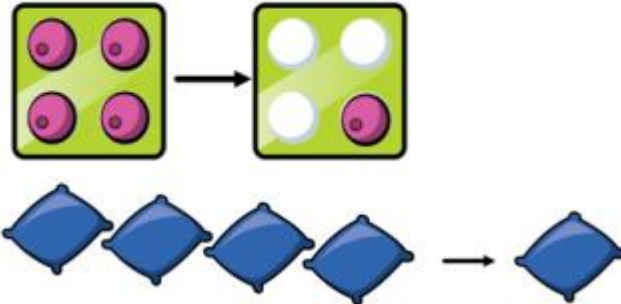

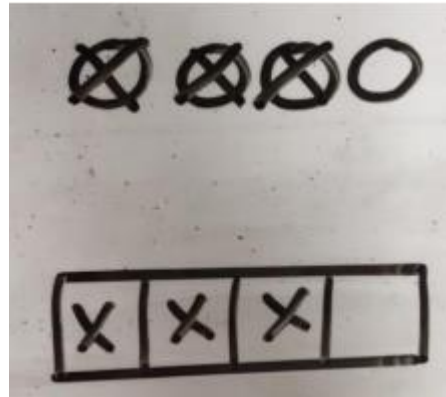

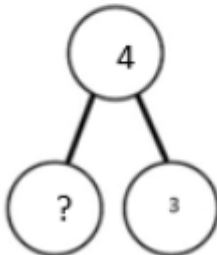

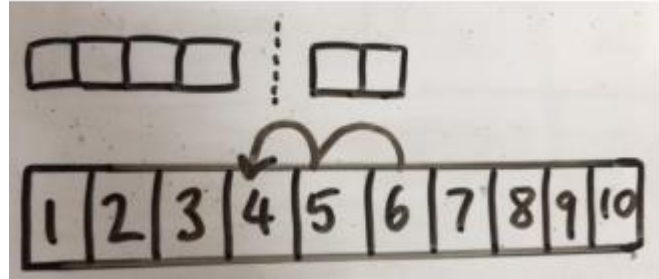

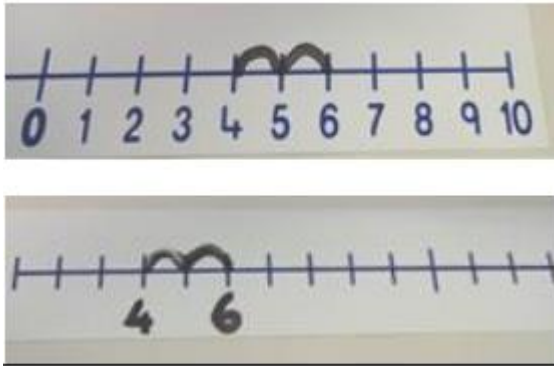

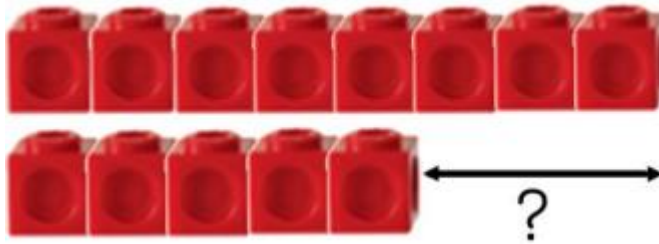

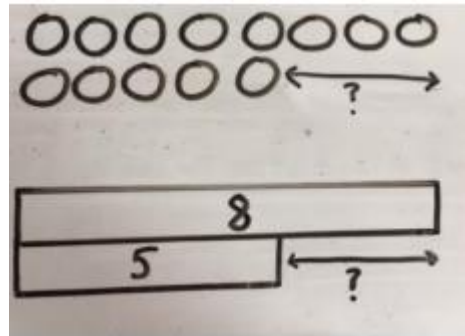

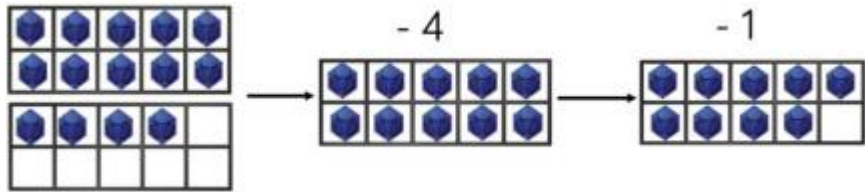

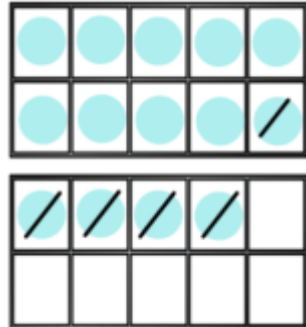

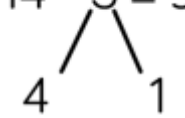

$\square = 21 + 34$

Calculate the sum of 21 and 34

Missing digital problem

10s	1s
20 10	1
30 30 10	?
?	5

Subtraction Key Vocabulary: take away, less than, the difference, subtract, minus, fewer, decrease						
Concrete	Pictorial	Abstract				
<p>Physically taking away and removing objects from a whole (tens frames, numicon, cubes, and other items such as beanbags could be used)</p> <p>$4 - 3 = 1$</p> 	<p>Children to draw the concrete resources they are using and cross out the correct amount. The bar model can also be used</p> 	<p>$4 - 3 =$</p> <p> $= 4 - 3$</p> <table border="1" data-bbox="1979 409 2318 495"><tr><td colspan="2">4</td></tr><tr><td>3</td><td>?</td></tr></table> 	4		3	?
4						
3	?					
<p>Counting back (using number lines or number tracks) children start with 6 and count back 2</p> <p>$6 - 2 = 4$</p> 	<p>Children to represent what they see pictorially eg.</p> 	<p>Children to represent the calculation on a number line or number track and show their jumps. Encourage children to use an empty numberline</p> 				
<p>Finding the difference (using cubes, numicon or Cuisenaire rods, other objects can also be used) Calculate the difference between 8 and 5</p> 	<p>Children to draw the cubes/other concrete objects which they have used or use the bar model to illustrate what they need to calculate</p> 	<p>Find the difference between 8 and 5 $8 - 5$, the difference is _____</p> <p>Children to explore why $9 - 6 = 8 - 5 = 7 - 4$ have the same difference</p>				
<p>Making 10 using ten frames $14 - 5$</p> 	<p>Children to present the ten frame pictorially and discuss what they did to make 10</p> 	<p>$14 - 5 = 9$</p>  <p>$14 - 4 = 10$ $10 - 1 = 9$</p>				

Column method using base 10
48-7

Children to represent the base 10 pictorially

Column method or children could count back 7

Column method using base 10 and having to exchange
41-26

Children to represent the base 10 pictorially remembering to show the exchange

Formal column method. Children must understand that when they have exchanged the 10 they still have 41 because $41 = 30 + 11$

Column method using place value counters
234 - 88

Represent the place value counters pictorially; remembering to show what has been exchanged

Formal column method. Children must understand what has happened when they have crossed out digits

Conceptual variation; different ways to ask children to solve $391 - 186$

Raj spent £391, Timmy spent £186. How much more did Raj spend?

Calculate the difference between 391 and 186

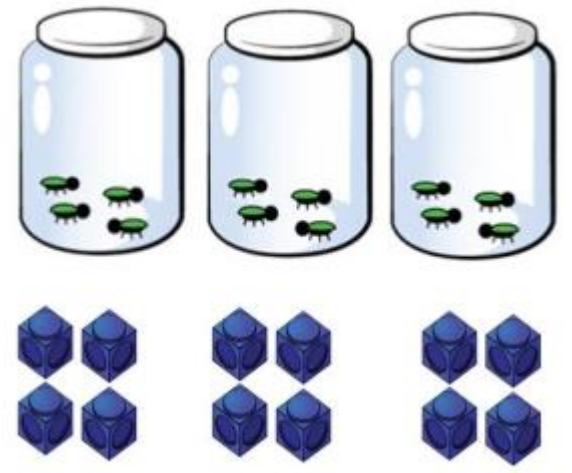

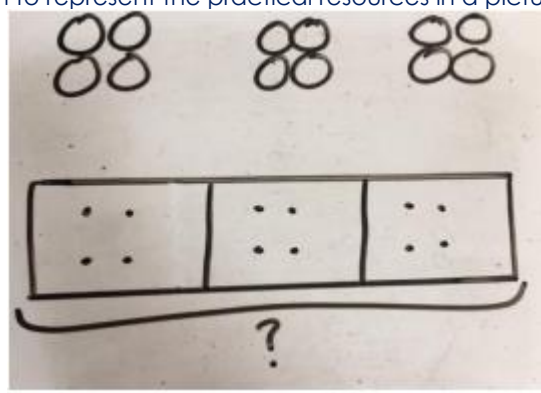

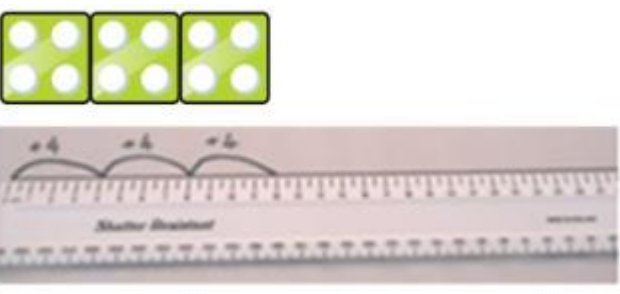

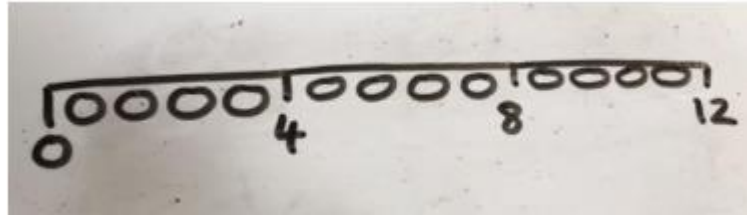

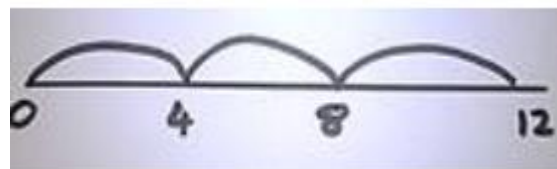

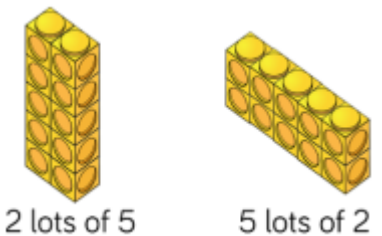

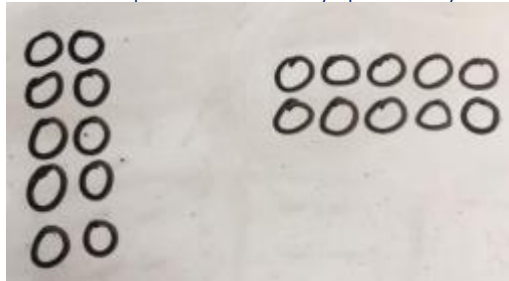

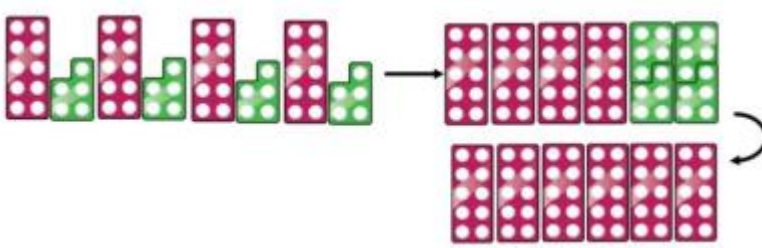

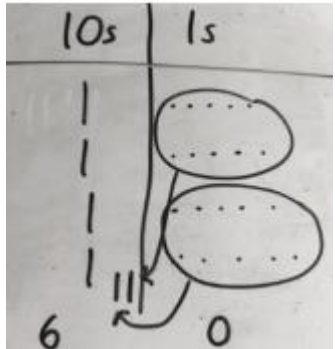

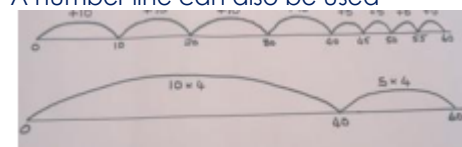

$\square = 391 - 186$

$$\begin{array}{r} 391 \\ -186 \\ \hline \end{array}$$

What is 186 less than 391?

Missing digit calculations

$$\begin{array}{r} 39\square \\ -\square\square6 \\ \hline \square05 \end{array}$$

<div>Multiplication</div> <div>Key Vocabulary: double, times, multiplied by, the product of, groups of, lots of, equal groups</div>		
Concrete	Pictorial	Abstract
<p>Repeated grouping/ repeated addition 3×4 $4 + 4 + 4$ There are 3 equal groups with 4 in each group</p> 	<p>Children to represent the practical resources in a picture and use a bar model</p> 	<p>$3 \times 4 = 12$ $4 + 4 + 4 = 12$</p>
<p>Number lines to show repeated groups 3×4</p> 	<p>Represent this pictorially alongside a number line eg.</p> 	<p>Abstract number line showing three jumps of four</p> <p>$3 \times 4 = 12$</p> 
<p>Use arrays to illustrate commutativity counters and other objects can also be used $2 \times 5 = 5 \times 2$</p> 	<p>Children represent the arrays pictorially</p> 	<p>Children to be able to use an array to write a range of calculations eg.</p> <p>$10 = 2 \times 5$ $5 \times 2 = 10$ $2 + 2 + 2 + 2 + 2 = 10$ $10 = 5 + 5$</p>
<p>Partition to multiply using numicon, base 10 or Cuisenaire rods 4×15</p> 	<p>Children to represent these manipulatives pictorially</p> 	<p>Children to be encouraged to show the steps they have made</p> <p>4×15 $\swarrow \searrow$ $10 \quad 5$</p> <p>$10 \times 4 = 40$ $5 \times 4 = 20$ $40 + 20 = 60$</p> <p>A number line can also be used</p> 

Formal column method with place value counters (base 10 can also be used)
3 x 23

Children to represent the counters pictorially

Children to record what it is they are doing to show their understanding

3×23 $3 \times 20 = 60$
 $20 \quad 3$ $3 \times 3 = 9$
 $60 + 9 = 69$

$$\begin{array}{r} 23 \\ \times 3 \\ \hline 69 \end{array}$$

Formal method with place value counters and exchanging
6 x 23

Children to represent the counters/ base 10 pictorially

Formal written method

$6 \times 23 =$

$$\begin{array}{r} 23 \\ \times 6 \\ \hline 138 \end{array}$$

$$\begin{array}{r} 1 \quad 2 \quad 4 \\ \times \quad 2 \quad 6 \\ \hline 7 \quad 4 \quad 4 \\ 2 \quad 4 \quad 8 \quad 0 \\ \hline 3 \quad 2 \quad 2 \quad 4 \\ \hline 1 \quad 1 \end{array}$$

Conceptual variation; different ways to ask children to solve 6 x 23

Mai had to swim 23 lengths 6 times in a week.
How many lengths did she swim in one week?

With the counters prove that $6 \times 23 = 138$

Find the product of 6 and 23

6×23

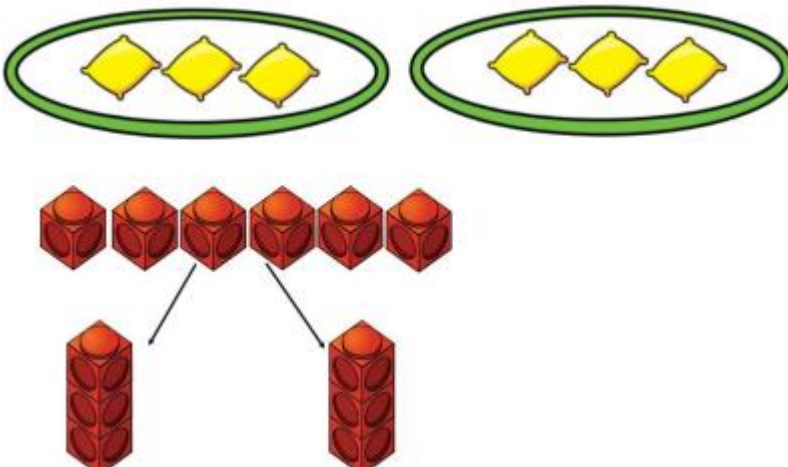

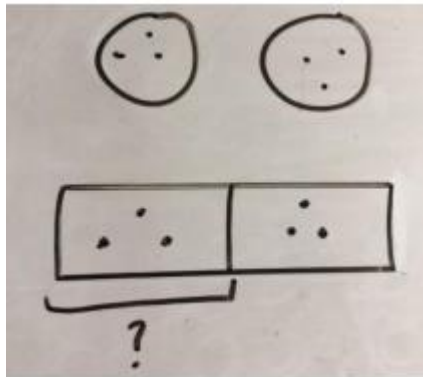

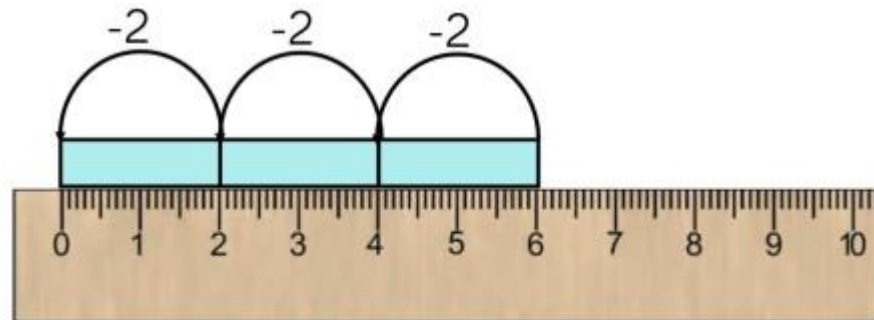

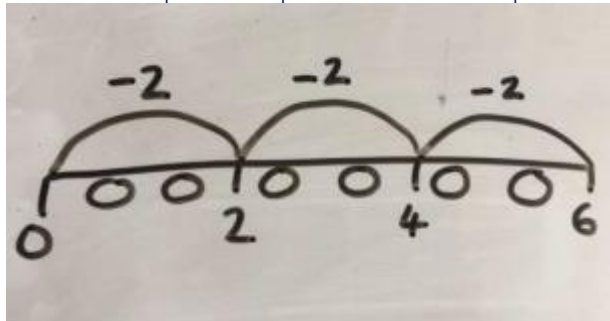

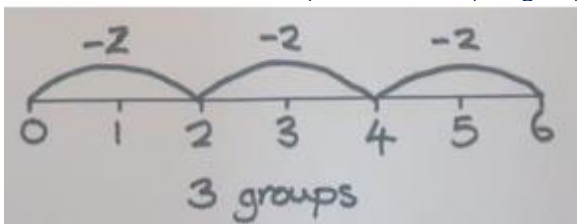

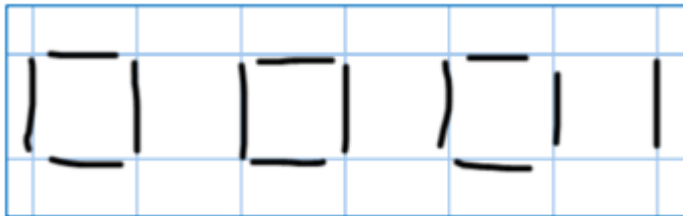

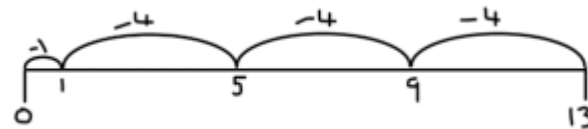

$$\boxed{} = 6 \times 23$$

$$\begin{array}{r} 6 \quad 23 \\ \times 23 \\ \hline \end{array} \quad \begin{array}{r} 23 \\ \times 6 \\ \hline \end{array}$$

What is the calculation?

What is the product?

Division Key Vocabulary: share, group, divide, divide by, half				
Concrete	Pictorial	Abstract		
<p>Sharing using a range of objects $6 \div 2$</p> 	<p>Represent the sharing pictorially</p> 	<p>$6 \div 2 = 3$</p> <table border="1" data-bbox="1979 294 2466 367"><tr><td>3</td><td>3</td></tr></table> <p>Children should also be encouraged to use their 2 times tables facts</p>	3	3
3	3			
<p>Repeated subtraction using Cuisenaire rods above a ruler $6 \div 2$</p>  <p>3 groups of 2</p>	<p>Children to represent repeated subtraction pictorially</p> 	<p>Abstract number line to represent the equal groups that have been subtracted</p> 		
<p>$2d \div 1d$ with remainders using lollipop sticks. Cuisenaire rods above a ruler can also be used $13 \div 4$</p> <p>Use of lollipop sticks to form wholes -squares are made because we are dividing by 4</p>  <p>There are 3 whole squares with 1 left over</p>	<p>Children to represent the lollipop sticks pictorially</p>  <p>There are 3 whole squares with 1 left over</p>	<p>$13 \div 4 = 3$ remainder 1</p> <p>Children should be encouraged to use their times tables facts; they could also represent repeated addition on a number line</p> <p>3 groups of 4 with 1 left over</p> 		
<p>Sharing using place value counters $42 \div 3 = 14$</p>	<p>Children to represent the place value counters pictorially</p>	<p>Children to be able to make sense of the place value counters and write calculations to show the process</p> <p>$42 \div 3$ $42 = 30 + 12$ $30 \div 3 = 10$ $12 \div 3 = 4$ $10 + 4 = 14$</p>		

Short division using place value counters to group $615 \div 5$

1. Make 615 with place value counters
2. How many groups of 5 hundreds can you make with 6 hundred counters
3. Exchange 1 hundred for 10 tens
4. How many groups of 5 tens can you make with 11 ten counters?
5. Exchange 1 ten for 10 ones
6. How many groups of 5 ones can you make with 15 ones?

Long division using place value counters $2544 \div 12$

We can't group 2 thousands into groups of 12 so will exchange them.

We can group 24 hundreds into groups of 12 which leaves with 1 hundred.

$$\begin{array}{r} 02 \\ 12 \overline{) 2544} \\ \underline{24} \\ 1 \end{array}$$

Represent the place value counters pictorially

Children to solve the calculation using the short division scaffold

$$\begin{array}{r} 123 \\ 5 \overline{) 615} \\ \underline{5} \\ 11 \\ \underline{10} \\ 15 \\ \underline{15} \\ 0 \end{array}$$

After exchanging the hundred, we have 14 tens. We can group 12 tens into a group of 12, which leaves 2 tens.

$$\begin{array}{r} 021 \\ 12 \overline{)2544} \\ \underline{24} \\ 14 \\ \underline{12} \\ 2 \end{array}$$

After exchanging the 2 tens, we have 24 ones. We can group 24 ones into 2 group of 12, which leaves no remainder.

$$\begin{array}{r} 0212 \\ 12 \overline{)2544} \\ \underline{24} \\ 14 \\ \underline{12} \\ 24 \\ \underline{24} \\ 0 \end{array}$$

Conceptual variation; different ways to ask children to solve $615 \div 5$

Using the part whole model below, how can you divide 615 by 5 without using short division?

I have £615 and share it equally between 5 bank accounts. How much will be in each account?

615 pupils need to be put into 5 groups. How many will be in each group?

$$5 \overline{)615}$$

$$615 \div 5 =$$

$$\boxed{} = 615 \div 5$$

What is the calculation?
What is the answer?

SEND Strategies	
	Here is how we will help:
Attention Deficit Hyperactivity Disorder	<p>A non-confrontational approach will be used in every aspect of the maths lesson.</p> <p>Adult support during the key skills and recap sessions where children may be using whiteboards to record their answers.</p> <p>Verbal praise is given whenever necessary to help boost confidence and self-esteem.</p> <p>Use of pictorial representations to support the learning taking place.</p> <p>Use of concrete resources to support new mathematical concepts are part of everyday teaching and learning.</p>
Anxiety	<p>A non-confrontational approach will be used in every aspect of the maths lesson.</p> <p>Adult support during the key skills and recap sessions where children may be using whiteboards to record their answers.</p> <p>Verbal praise is given whenever necessary to help boost confidence and self-esteem.</p> <p>Use of pictorial representations to support the learning taking place.</p> <p>Use of concrete resources to support new mathematical concepts are part of everyday teaching and learning.</p>
Autism Spectrum Disorder	<p>A non-confrontational approach will be used in every aspect of the maths lesson.</p> <p>Adult support during the key skills and recap sessions where children may be using whiteboards to record their answers.</p> <p>Verbal praise is given whenever necessary to help boost confidence and self-esteem.</p> <p>Use of pictorial representations to support the learning taking place.</p> <p>Use of concrete resources to support new mathematical concepts are part of everyday teaching and learning.</p>
Dyscalculia	<p>Concrete resources and manipulatives are always made available and are clearly labelled and accessible</p> <p>Adults will ensure children understand how to use these manipulatives to support the specific learning goal.</p> <p>Key Skills sessions incorporate activities that specifically focus on recall and repeating areas of mathematics the children have already explored</p> <p>Graph paper can be provided for written calculations (i.e. long division).</p> <p>Rulers and highlighters can be used to visually support the drawing/organisation of written calculation methods.</p> <p>Peer and adult support will be built into the lesson throughout to support any corrections with recording dictated numbers/number formation.</p> <p>Peer teaching will be used as a great way of the child sharing new knowledge that has been learnt.</p>
Dyslexia	<p>Different coloured paper can be provided for any written recordings.</p> <p>A text font size of 12 or above is used for any work sheets/PowerPoint presentations.</p> <p>Questions will be short with visual representations (diagrams, pictures, illustrations) to support.</p> <p>Data, charts and diagrams are clearly organised and structured.</p> <p>Specific clear, rounded and spaced out fonts are used on any writing within the lesson.</p> <p>Large spaces for working out will be provided under each question given on a work sheet or in a maths book.</p>
Dyspraxia	<p>A large learning space will be provided.</p> <p>Instructions can be written out for the child, using different colours for each line.</p> <p>Children can move around the classroom whenever necessary.</p> <p>When using mathematical equipment, an adult or supportive peer will provide demonstration of how to successfully use the equipment if required.</p> <p>Adults will ensure they are watching closely for signs of distress and provide a quiet, calm learning environment.</p>
Hearing Impairment	<p>A suitable working space will be agreed upon between the teacher and child in a safe, private conversation before the lesson.</p> <p>Adults within the classroom will ensure the child's hearing aid is turned on before the lesson begins.</p> <p>Adults will ensure they are facing the child when they are talking/giving instructions.</p> <p>Questions and any information given by peers will be repeated clearly to ensure the child has heard what their peers have asked/said.</p> <p>Children will be seated towards the front of the classroom to ensure they have a clear line of vision, especially during the input where the whiteboard will be the main focus</p>
Toileting Issues	<p>Children will be able to leave and return to the classroom whenever necessary.</p> <p>A seating arrangement will be made so that the child can enter and leave the classroom discretely.</p> <p>All adults and children within the classroom environment will respect the child's privacy.</p>
Cognition and learning challenges	<p>Learning is differentiated to meet the child's specific learning needs.</p> <p>This will ensure that the task being given to the child matches their individual academic needs.</p> <p>Concrete resources and visual representations will be given to the child to support any mental and written calculations needed.</p> <p>Self-checks can be used at each stage of a task so that children are aware of the tasks required of them and their achievement of reaching this.</p> <p>Key vocabulary and ideas will be addressed regularly throughout the maths lesson to check understanding.</p> <p>Information will be repeated clearly, varying the vocabulary used.</p>

	<p>SMART pages and PowerPoint slides will be simple and uncluttered with key information highlighted.</p> <p>Children can be provided with a 'work-buddy' during peer activities/opportunities</p>
Speech, Language & Communication Needs	<p>Visual timetables, signs and symbols will be used to support communication within the maths lesson.</p> <p>Visual displays (maths working walls) will be used to support understanding of key information.</p> <p>Non-verbal clues will be used to back up what is being said.</p> <p>Any verbal instructions/information will be at a slow, clear pace that matches the child's understanding.</p> <p>Adults will regularly check the child's understanding so that adults can identify any misconceptions or misunderstandings</p>
Tourette Syndrome	<p>Adults will listen and respond to the child with support and understanding.</p> <p>A structure will be provided (tick list) to support the learning taking place, this will be differentiated to the maths activity and include the main elements needed to aid the child's attention.</p> <p>There will be understanding that the activity may not be completed</p>
Experienced Trauma	<p>The maths learning environment will be a calm, trusting place where children feel supported with their emotions at all times.</p> <p>Adults working with the child will be aware of any triggers and any ways to further support the child within the classroom.</p> <p>There will be a consistent approach to expectations and behaviour that are based on positive praise.</p>
Visual Impairment	<p>Anything that is being displayed (PowerPoint presentation, maths working wall) will be large and easily visible from anywhere in the classroom.</p> <p>Children will be able to 'take a break' from their maths learning whenever needed to ensure they are able to focus visually and avoid fatigue.</p> <p>Images and text within any printed work will be enlarged with the recommended font size.</p> <p>Children will be provided with a thicker and darker pencil to ensure their writing is clear.</p> <p>Children may be provided with a larger squared exercise book if preferred.</p>
